

**Directions:**

Change half the bowl water weekly. Add 1 capful (5 ml) of Betta Bowl Essential to a quart ( or 1 liter) of tap or purified water and use for water changes or to replace for evaporation.

**Considerations for use:**

Betta Bowl Essential contains a special formula of nutrients, conditioners and minerals developed specifically for small bowls containing bettas and plants. The use of this product on a weekly basis and during water changes restores substances that are absorbed by these organisms. Kent Betta Bowl Essential can be added to purified or tap water to ensure a proper balance of nutrients and minerals for the establishment and maintenance of healthy fish and plants.
