

**Directions:**

Shake before use.

**Regular maintenance:**

Dose 5 ml per 100 liters (25 gallons) once every 2 or 3 weeks.

Adjust dosage according to individual requirements (use an iodine test, e.g., Salifert's Iodine Profi-Test). Every 5 ml per 100 liters (25 gallons) will increase the iodine concentration (that is iodide + iodate) by approx. 0.04 mg/L.

Keep out of reach of children. In case of contact with eyes rinse with plenty of water. Only for aquarium-hobby use. Not for human consumption (directly or indirectly)!
