

UltraLife Red Slime Remover is a revolutionary time tested product that will effectively and safely remove red slime algae quickly without harm to fish, invertebrates or corals. The results will amaze you.

DIRECTIONS: Thoroughly mix 1 level spoonful for each 15 gallons of aquarium water with a small amount of water from the aquarium to be treated. Pour dissolved solution into the aquarium. Repeat after 48 hours if necessary. Wait at least one week before additional treatments. Keep out of the reach of children. For aquarium use only.

NOTE: May effect ph and oxygen levels.
